

1. The major portion of acceptable material will fall through the first (5) rolls.
2. If more or less rolls than the standard are used, add or deduct 11-7/8" per roll, to adjust dimensions "A" and "B" (I.F.O.=InterFace Opening between discs)
3. Weight of Screen will vary based on I.F.O. and will be furnished with proposal.
4. Can effectively unload a Hog or Chip Screen by removing acceptable fines.
5. Anti Stall control panel is available to Reverse rotation for a short interval to clear objects causing blockages.
6. Zero speed switch is available for the final drive shaft to sense a mechanical drive stoppage.
7. The first (2) shafts shown are Orientation rolls to reduce plunging of sticks.

MODEL SIZE	STD. NO. OF ROLLS	A	B	C	D	MOTOR(S)	WT. (lbs)
